

S-262  
Old Bank of Marion  
Marion  
public

~~c. 1900~~ 1914

*separately*  
The Old Bank of Marion (~~was~~ the Marion Pharmacy) is sited on the northwest corner of the Marion crossroads. The *early twentieth* ~~was~~ century gable-front polished brick bank building is one of the most architecturally distinguished structures to remain standing in this rural crossroads village. The two-bay principal elevation has a classical pedimented entrance with brick pilasters accented with limestone capitals and bases. The adjacent window as well as the small Palladian pediment window are highlighted with limestone arches. The west side elevation is marked by a cross-gable.

When the two banks in Marion, Eastern Shore National and the Bank of Marion, merged, this structure was abandoned and most recently converted into a village pharmacy.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Old Bank of Marion (now the Marion Pharmacy) stands on the northwest corner of the Marion intersection. The gable-front polished brick bank faces southwest with the roof running on a northeast/southwest axis.

The rectangular stretcher bond brick structure is two bays across by two rooms deep and is covered by a medium pitched asphalt shingle roof.

The two-bay main elevation has a classical pedimented entrance in the left (west) bay and a blocked-up window in the right (east) bay. A classical pediment caps the front elevation. The granite steps and a classical pedimented door frame surround the double-leaf glazed door. Brick pilasters rise on granite plinths and have granite capitals. The entablature and cornice pediment surround an arched transom with a segmental granite apron. The arched cornice has a row of dentils under the fascia as well as a crown molding.

The adjacent window opening has been blocked up, but the keystone arch and granite sill remain exposed. The gable-front is enclosed with a pediment and detailed with the same bed molding and dentil row. A small Palladian window, also outlined in stone, pierces the typanum space.

Both sides of the bank building have blocked up windows with plain stone lintels and sills. A narrow brick stove rises from the southeast slope of the roof. A metal ridge covers the roof peak and is embellished by a small finial at each end.

The back (northeast) facade is treated in a similar manner as the sides with less elaborate finish. The gable end, however, also has a small Palladian window.

The interior has been reworked for conversion into a pharmacy with shelving that covers most walls.

## 8. Significance

and/or

Applicable Exception: ☐ A ☐ B ☐ C ☐ D ☐ E ☐ F ☐ G

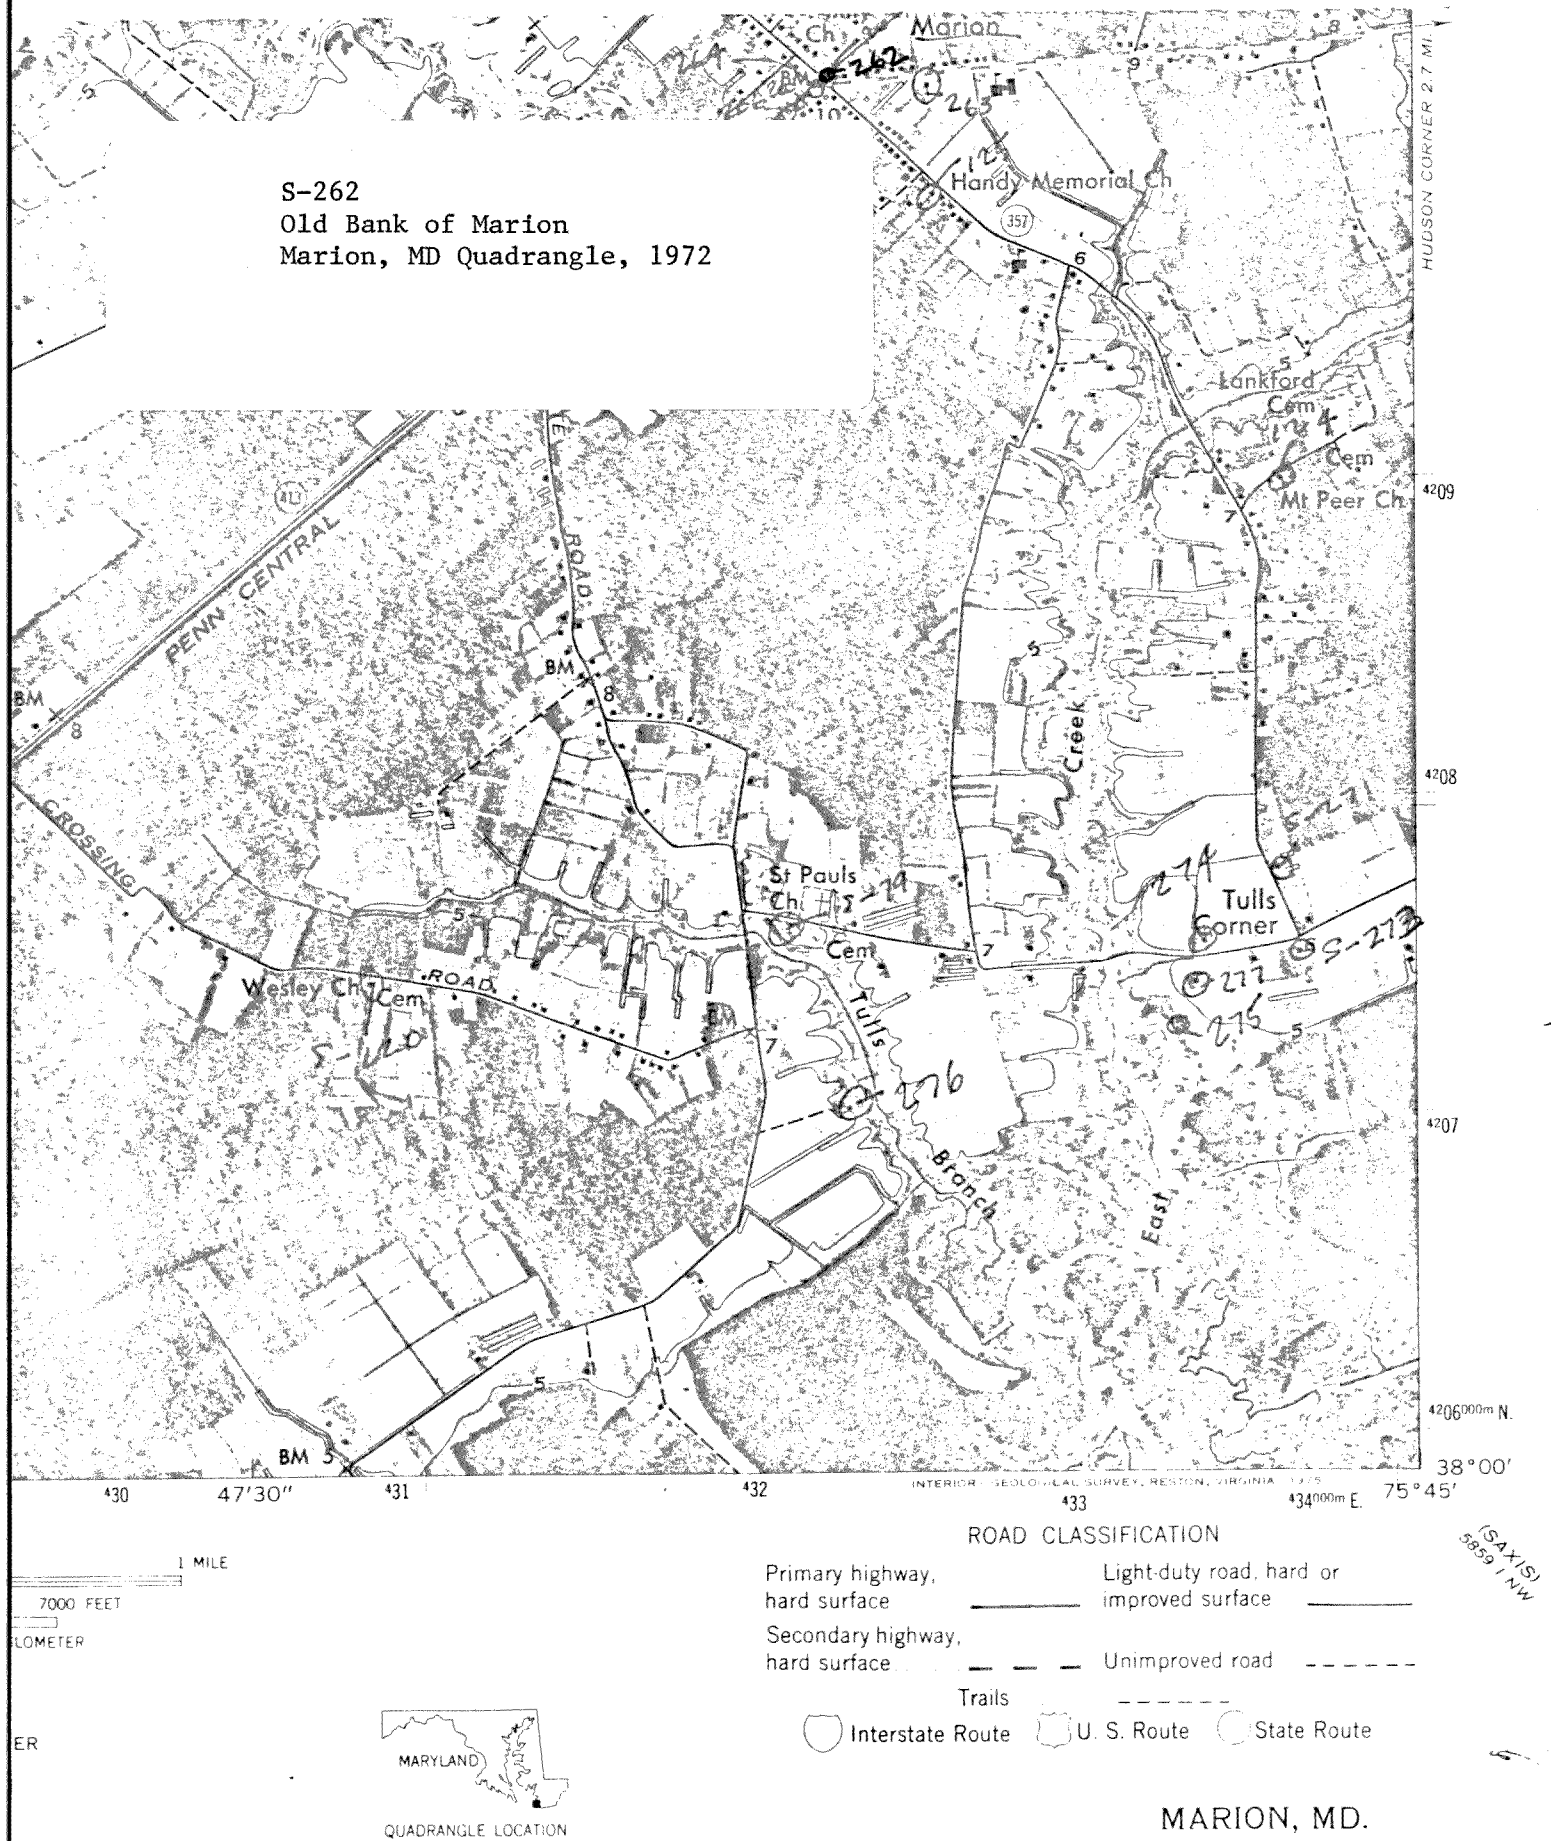

Level of Significance: ☐ national ☐ state ☐ local

Prepare both a summary paragraph of significance and a general statement of history and support.

The Old Bank of Marion is one of the most significant buildings still standing in this once railroad-oriented village. The Bank of Marion and the Eastern Shore National Bank merged and moved their offices into one building. (S-265, which rendered this structure obsolete as a bank.
